

D Mart Sales Analysis – Dashboard & Summary

D Mart Sales Analysis - FY 2023

Prepared by: Tushar Biswas | Internship Day 2 | Task 2

Overview

D Mart recorded a total revenue of ₹17M across 25,000 orders in FY 2023, with an average sale value of ₹678 and a customer rating of 3/5. The peak sales day was 31 March 2023, driven by end-of-month demand.

Key Findings

- Marketing:** Instagram is the top-performing channel at ₹5.76M (34%), followed by Facebook at ₹4.22M. TV contributes the least at ₹1.4M, suggesting digital channels far outperform traditional ones.
- Geography:** Maharashtra leads in sales volume across all marketing channels. Andhra Pradesh, Gujarat, and Telangana show comparable but lower performance, indicating room for regional expansion.
- Product:** Harpic Bathroom Cleaner — Floral is the top product at ₹8.28L, contributing significantly to the Household category. Local products dominate category sales at ₹6.8M, nearly double Branded (₹4.1M).
- Operations:** 52% of orders are successfully delivered, with 35% still in shipped status. Cancellation and return rates are negligible, reflecting a healthy supply chain.
- Payments:** Paid orders stand at ₹1.35Cr while Pending sits at ₹34.24L — a collection gap worth monitoring. Debit cards are the most used payment method; UPI adoption remains low at ₹20.72L.
- Subscriptions:** 55.79% of customers are on Freepass, with only 12.73% on Premium Plus. This represents a strong upsell opportunity that could meaningfully grow recurring revenue.

Recommendations

- **Double down on Instagram** — highest ROI marketing channel
- **Investigate Feb–Mar sales dip** — seasonal or operational issue?
- **Push UPI adoption** — growing payment trend in India, currently under utilised
- **Convert Freepass users to Premium** — even 10% conversion boosts revenue significantly
- **Focus on Maharashtra expansion** — already the strongest market, can be scaled further
